PROFESSIONAL SUMMARY

Senior JavaScript/TypeScript Full-Stack Developer with 5+ years building SaaS products, APIs, data workflows, and responsive web applications. Strong experience with React, Next.js, TypeScript, Node.js, FastAPI, PostgreSQL/MySQL, authentication, background queues, database migrations, testing, CI/CD, and deployment, with recent work across AI-enabled creative automation, industrial drone inspection, and geospatial workflows. Comfortable owning features end to end: frontend architecture, API design, backend services, database design, background jobs, integrations, performance, accessibility, and production delivery.

TECHNICAL SKILLS

Frontend/Mobile: JavaScript ES6+, TypeScript, React.js, Next.js, Tailwind CSS, React Native, Expo, Electron

State & Data: TanStack Query v5, Redux Toolkit, Zustand, React Hook Form, Context API

AI / CV / GenAI: Google Gemini SDK, LLM API Integration, AI Pipelines, YOLOv8, ONNX Runtime, OpenCV

Backend: Node.js, Express, FastAPI, Django, REST APIs, BullMQ Pro, Celery

Databases & Auth: PostgreSQL, MySQL, MongoDB, Prisma ORM, Supabase, Firebase, Better Auth, JWT/OAuth

Storage/CDN/Queues: Redis, Bunny CDN, Supabase Storage, Sharp, resvg-js, Multer

DevOps & Quality: Git, GitLab/GitHub CI, Docker, Vercel, Linux, Nginx, Playwright E2E, Jest, pytest, Vitest

Practices: Agile/Scrum, Code Review, WCAG Accessibility, TypeScript Strict, ESLint, Prettier

Languages: Arabic (Native), English (Professional), French (Intermediate)

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer (Contract)

Talio | Remote, France | February 2026 - August 2026

Client Project: Creaboost | AI-powered creative content platform | February 2026 - May 2026 | Scope completed

Stack: Next.js 14, React 18, TypeScript, Node.js, Express, GenAI, BullMQ Pro, Supabase, Redis, Bunny CDN

- Contributed to a GenAI-powered brand import pipeline leveraging Google Gemini for automated content analysis, integrating external scraping tools (Firecrawl, ScrapingBee) with a BullMQ Pro background job queue and per-workspace rate limiting.
- Developed a comprehensive media asset library featuring batch drag-and-drop uploads, content-hash deduplication, and automated server-side image conversion (SVG to PNG) via Sharp and resvg-js, served via Bunny CDN.
- Optimized frontend performance by building reusable, cursor-based infinite scroll React hooks with IntersectionObserver, standardizing data fetching and eliminating code duplication.
- Supported production delivery through Supabase database migrations, upload pipeline security audits, Vercel deployment workflows, and accessible responsive UI features.

Full-Stack Developer (Client Contract)

Indus Inspection | Remote | October 2025 - August 2026

Industrial Drone Inspection Platform | Client Product | Early Product Team / Full-Stack Developer

Stack: Next.js 16, React 19, TypeScript, FastAPI, PostgreSQL, Prisma, YOLOv8/ONNX, OpenCV

- Built a full-stack industrial inspection platform for towers/pylons, wind, and solar assets, connecting drone imagery, engineering-plan calibration, AI-assisted defect review, and client-ready exports.
- Engineered an async FastAPI/Celery/Redis pipeline with YOLOv8/ONNX inference, SSE job progress, bounding-box storage, severity scoring, reviewer overrides, and PDF/ZIP export packaging.
- Implemented geospatial image positioning with OpenCV plan analysis, EXIF metadata, PyProj coordinate transforms, a Konva plan viewer, and MapLibre workspace maps.
- Hardened auth and operations with Better Auth, server-side token isolation, workspace/project role gates, database migrations, upload-size middleware, and invitation flows.

Full-Stack Engineer

DR STONE | Casablanca, Morocco | July 2022 - January 2026

Progression: Frontend Developer (Jul 2022 - Feb 2023) to Full-Stack Engineer (Feb 2023 - Jan 2026). Began with Wix CMS and a JavaScript/jQuery page integrating a Roboflow image-analysis API.

Dr Turbine | Pre-production wind turbine blade inspection platform | June 2025 - January 2026

Inspection workspace for drone imagery and structured blade review

Stack: Next.js 15, React 18, TypeScript, PostgreSQL, Prisma, Sharp, exifr, Tailwind CSS

- Built an inspection workspace organizing drone imagery by wind park, turbine, blade, and blade section.
- Developed image uploads with drone metadata extraction, GSD estimates, thumbnails, and PostgreSQL-backed inspection records.
- Implemented blade calibration and canvas-based review tools for defect annotations, measurements, and severity labels.
- Worked on APIs and data models for inspections, images, annotations, and calibration in a pre-production product.

FILAH! | Production precision agriculture SaaS platform | February 2023 - June 2025

Stack: React, Next.js, TypeScript, Python, Django, MySQL, Leaflet.js

- Helped evolve the agriculture prototype into FILAH!, first with React and a Python backend, then Next.js and Django; shipped features for 500+ farmers managing 10,000+ plots.
- Built interactive mapping and satellite-data views with Leaflet.js for plot-level monitoring and AI-assisted crop analysis.
- Optimized MySQL queries and caching, improving API response time by 45% and reducing report generation time by 70%.

Additional work: Built web, mobile (React Native/Expo), and desktop (Electron) applications; supported internal Windows, software, system, and network troubleshooting.

Freelance Web Developer

Self-Employed | Remote | 2020 - 2022

- Developed responsive web applications using React.js, Bootstrap v4/v5, JavaScript, HTML5, and CSS3/SCSS for local client websites and product interfaces.
- Built responsive, cross-browser web interfaces for client projects, improving usability across mobile and desktop devices.

EDUCATION & PROFESSIONAL DEVELOPMENT

Bachelor's Degree in Life Sciences | University Sidi Mohamed Ben Abdellah, Fez | 2014 - 2018

IT Diploma | Office Software, IT Maintenance & Networks | 2019
