

# NAMRI AMINE

## Senior Full-Stack Developer | React • Next.js • TypeScript • Node.js | GenAI & LLM Integration

+212-638-918700 | [aminenamri21@gmail.com](mailto:aminenamri21@gmail.com) | [linkedin.com/in/namriamine](https://linkedin.com/in/namriamine) | Casablanca, Morocco

### PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 6+ years building production web applications and AI-enabled platforms across creative automation, industrial drone inspection, and geospatial SaaS. Proven track record delivering end-to-end features from React architecture and accessible UI systems to REST APIs, job queues, database migrations, and AI/CV pipelines. Experienced with Google Gemini, YOLO-assisted inspection workflows, CDN delivery, and background processing in agile remote teams.

### TECHNICAL SKILLS

**Frontend/Mobile:** React.js 18/19 (5+ yrs), Next.js 13-16, TypeScript 5, Tailwind CSS, React Native, Expo, Electron

**State & Data:** TanStack Query v5, Redux Toolkit, Zustand, React Hook Form, Context API

**AI / CV / GenAI:** Google Gemini SDK, LLM API Integration, AI Pipelines, YOLOv8, ONNX Runtime, OpenCV

**Backend:** Node.js, Express 5, FastAPI, BullMQ Pro, Celery, REST APIs, GraphQL, Socket.IO

**Databases & Auth:** PostgreSQL, MySQL, MongoDB, Supabase, Firebase, Prisma ORM, Better Auth, JWT/OAuth

**Storage/CDN/Queues:** Bunny CDN, Supabase Storage, Sharp, resvg-js, Multer, Redis, BullMQ Pro

**DevOps & Quality:** Git, GitLab, GitHub, Docker, CI/CD, Vercel, Linux, Nginx, pytest, Vitest, Playwright

**Practices:** Agile/Scrum, Code Review, WCAG Accessibility, TypeScript Strict, ESLint, Prettier

**Languages:** Arabic (Native), English (Professional), French (Intermediate)

### PROFESSIONAL EXPERIENCE

#### Senior Full Stack Developer

*Talio | Remote (Paris, France) | February 2026 – Present*

*Client: **Creaboost** | AI-powered creative content platform | February 2026 – May 2026*

*Stack: Next.js 14, React 18, TypeScript, Node.js, Express, GenAI, BullMQ Pro, Supabase, Redis, Bunny CDN*

- Architected a GenAI-powered brand import pipeline leveraging Google Gemini for automated content analysis, integrating external scraping tools (Firecrawl, ScrapingBee) with a BullMQ Pro background job queue and per-workspace rate limiting.
- Developed a comprehensive media asset library featuring batch drag-and-drop uploads, client-side deduplication, and automated server-side image conversion (SVG to PNG) via Sharp and resvg-js, served via Bunny CDN.
- Optimized frontend performance by building reusable, cursor-based infinite scroll React hooks with IntersectionObserver, standardizing data fetching and eliminating code duplication.
- Designed complex, responsive UI features (multi-step wizards, accessible lightboxes) while securing backend infrastructure via Supabase database migrations and upload pipeline security audits.

## Indus Inspection - Industrial Drone Inspection Platform

*Independent Project | 2026*

*Stack: Next.js 16, React 19, TypeScript, FastAPI, PostgreSQL/Prisma, Better Auth, Celery/Redis, YOLOv8/ONNX, OpenCV, PyProj, MapLibreGL, react-konva*

- Built a full-stack industrial inspection platform for towers/pylons, wind, and solar assets, connecting drone imagery, engineering-plan calibration, AI-assisted defect review, and client-ready exports.
- Engineered an async FastAPI/Celery/Redis pipeline with YOLOv8/ONNX inference, SSE job progress, bounding-box storage, severity scoring, reviewer overrides, and PDF/ZIP export packaging.
- Implemented geospatial image positioning with OpenCV plan analysis, EXIF metadata, PyProj coordinate transforms, a Konva plan viewer, and MapLibre workspace maps.
- Hardened auth and operations with Better Auth, server-side token isolation, workspace/project role gates, upload-size middleware, and invitation flows.

## Senior Frontend Developer | Full Stack

*DR STONE | Casablanca, Morocco | July 2022 – January 2026*

### Dr Turbine — AI-Powered Wind Turbine Inspection Platform

*Stack: Next.js 15, React 19, TypeScript, Node.js, MySQL, Socket.IO, Prisma, shadcn/ui*

- Architected frontend component library processing 10,000+ drone images monthly with 95% AI damage detection accuracy
- Built real-time collaborative annotation system with Socket.IO supporting 5+ simultaneous inspectors
- Optimized React rendering for large image datasets using lazy loading, virtualization, and Canvas-based overlays
- Reduced manual data entry by 80% through automated metadata extraction from drone imagery

### FILAH! — Precision Agriculture SaaS Platform

*Stack: Next.js, TypeScript, Node.js, MySQL, Prisma, NextAuth, Leaflet.js, shadcn/ui*

- Deployed SaaS platform serving 500+ farmers managing 2,000+ agricultural plots with 92% AI crop detection
- Built interactive geospatial mapping with Leaflet.js and real-time satellite data visualization
- Optimized database queries and caching, improving response time by 45% and reducing report generation time by 70%

**Additional Projects:** Developed multiple webs, mobile (React Native/Expo), and desktop (Electron) applications. Node.js API development, database design, and authentication implementation.

## Freelance Web Developer

*Self-Employed | Remote | 2020 – 2022*

- Developed responsive web applications using React.js, Bootstrap v4/v5, JavaScript, HTML5, and CSS3/SCSS resulting in a 30% increase in mobile engagement for local clients.
- Built mobile-friendly interfaces with cross-browser compatibility

## EDUCATION & PROFESSIONAL DEVELOPMENT

**Bachelor's Degree in Life Sciences - University Sidi Mohamed Ben Abdellah - Fez | 2014 - 2018**

**IT Diploma - Office Software, IT Maintenance & Networks | 2019**
